Beeswax from their abdomen to build the hive

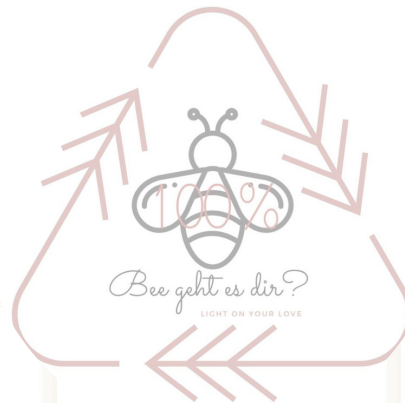

Original Stone Decor

Bees synthesize nectar in their bodies from flower nectar and secrete wax from an organ in their abdomen called the wax line. The wax secreted from the wax line is then mixed with pollen and other substances in the mouth to form the hive. In other words, beeswax is the hive itself.

Bee's Wax is also used as an ingredient in candles, floor and leather waxes, medicines, and cosmetics. It contains various ingredients such as palmitic acid, myricyl alcohol, 27 vitamins and minerals derived from pollen, 22 amino acids, 80 enzymes, polyphenols, and carotene.

Beeswax costs about 3 000 yen/kg from Japan.
Overseas-produced, about 6,800 yen/kg.
Beeswax is the rarest and most valuable

The effects of beeswax candles, which are taken from beehive material, include a relaxing effect as the 1/f fluctuation of the flame reduces the sympathetic nervous system's excitement and makes the parasympathetic nervous system dominant.

Beeswax candles produce 4-6 times more negative ions than waterfalls.

We offer them at low prices and also provide a refill service to prevent the waste of resources. (Only in Switzerland).

Natural stone for dining tables and bathrooms

” Natural stone for dining tables and bathrooms?”

Some people are surprised. Natural stone is not only beautiful to look at, but it is also a practical product.

It is resistant to heat and cold, and stains can be easily removed with the usual detergent and water.

Natural stones also contain healing powers. Depending on the purpose, you can place one of your favorite natural stones in your home to complete a place that will lift your spirits and look wonderfully classed up.
